Re: LV12306

Hurst-Kolmogorov dynamics as a result of extremal entropy production  
by Demetris Koutsoyiannis

Dear Dr. Koutsoyiannis,

We have considered your manuscript and conclude that it is not suited  
for Physical Review Letters.

We make no judgment on the correctness or technical aspects of your  
work. However, from our understanding of the paper's physics results,  
context, and motivation, we conclude that your paper does not meet the  
Physical Review Letters criteria of impact, innovation, and interest.  
Our criteria require a clear justification for consideration of the  
paper by PRL, rather than by a specialized journal. Your work appears  
better suited for submittal to the latter. [Please see our editorials  
<http://prl.aps.org/edannounce/PRLv95i7.html> (2005) and  
<http://prl.aps.org/edannounce/PhysRevLett.103.010001> (2009).]

In view of our assessment, we are not sending your manuscript out for  
review.

If you feel we have misjudged your paper, we would consider a revision  
that attempts to meet our journal's criteria. The abstract,  
introduction, and conclusion should convey clearly the importance and  
interest of the work to our broad readership. If we are not persuaded  
that review is appropriate, we may consult a Divisional Associate  
Editor on that question. If we find it warranted, or the Divisional  
Associate Editor so recommends, we will seek anonymous review.

Yours sincerely,

Sonja Grondalski  
Assistant Editor  
Physical Review Letters
