## KEYWORDS

flood risk assessment, GIS, HEC-RAS, hydrodynamic simulation, pluvial inundation, podoniftis basin-Greece, surface runoff, urban flood modeling

## A Correction on Effect of building representation on pluvial flood risk in urban areas: the podoniftis basin, Greece

by Alexopoulos MJ, Dimitriadis P, Mitsi E, Koutsoyiannis D, Istrati D and Iliopoulou T (2026). *Front. Built Environ.* 12:1757749. doi: 10.3389/fbuil.2026.1757749

There was a mistake in [Figure 12](#) as published. The panel titles were mislabeled. The published order was “CN100-No Bld. Mod.”, “BB-5 m”, “SB”, and “BR-n = 10”. The correct order of panel titles should be “CN100-No Bld. Mod.”, “BB-5 m”, “BR-n = 10”, and “SB”. Minor graphical adjustments were also made to improve readability: the figure height was slightly reduced, the rightmost x-axis coordinate labels were removed to avoid crowding between adjacent panels, and x-axis coordinates were added to the top-row quadrants. The corrected [Figure 12](#) appears below.

The original article has been updated.
